2017 COMMUNITY NEWSLETTER – SUMMER EDITION

Greetings & Blessings to all!

We are now entering a busy time of the year when families are either planning or getting ready to go on vacation. Our wish for you is that whatever you do, enjoy the moments, relax and most of all keep safe.

Operational Matters

The operating cycle for fiscal year 2016/17 ended on March 31st, 2017. Alberta Health Services provided an operating grant for operations; however, increases in the cost of supplies/salaries and on-going maintenance of our aging facility presented challenges for the operations.

The service volumes have not changed for fiscal year 2016/17; however, we continue to face public pressure to offer Emergency Services 24 hours per day, seven days per week. Regrettably, AHS hasn't provided the required resources at this time.

The capital equipment allocation for 2016/17 was approximately \$159,000.00. Capital equipment replacements included items such as:

- New Beds
- Endoscopes
- Scope Cabinet
- Electric Walker
- ECG Machine
- 2011 Defibrillator Machine.

Transportation of Residents from our site for medical appointments to other urban (unapproved) sites has become a challenge. We are currently embarking on a plan to purchase a mini-van for this purpose. Donations especially targeting a transport vehicle would be appreciated. The current capital cost is approximately \$42,000.00. We have now raised \$21,000.00 and are hopeful that our target will be met by December 2017.

Partnership with Others

We continue to build strong partnerships with Alberta Health Services, Alberta Seniors and Housing, Lamont County Housing Foundation, University of Alberta Rural Medical Student and Pharmacy Elective Programs, University of Alberta Family Residency Program, Heartland Primary Care Network, NAIT, Lakeland & Norquest Colleges and others.

Partnership with Others – continued ..

These partnerships are important to us since valuable learning opportunities are gained from interactions with residents and students.

Our Family Physicians, Supervisors and front-line Staff provide support to Students and Residents alike. Once again, we have arrangements in place for the 2017/18 fiscal year to accept:

- Medical Students
 - Medical Residents
 - Pharmacy Students
 - Laboratory/X-ray Students
 - Paramedic Students
 - Nursing Students
- and others.

FACILITY UTILIZATION

For the period for the year ending March 31, 2017

Statistical

Mundare Office

Phone: 780-764-2200
Clinic Day & Hours: **Thursday 2:30 – 5:30 p.m.**
Note: **Dr. Slanina** offers STEM Cell Injections at his
Office Clinic. This procedure is used to assist in the
regeneration of ligaments/joint tissue, etc. Please call his
Clinic for further information.

Security

Please note that for security reasons, the Main Entrance to
the Hospital will be locked from 8:30 p.m. daily and will
be re-opened for public access at the following times:

Monday through Friday 6:30 a.m.
Weekends and Stat Holidays 7:00 a.m.

**Patients requiring Emergency Services are asked to
proceed directly to the Ambulance Entrance.**

Emergency Services

A reminder to Residents that the **Emergency/Out-
Patient Department** is open **daily (including weekends
and statutory holidays)** between the hours of **8:00 a.m.
and 8:00 p.m.** A Physician is on-call for emergency
services. The Emergency Department is opened for use by
Patients who are in need of Acute Emergency Services;
e.g. severe trauma, chest pain, acute respiratory distress,
severe allergic reactions and other medical emergencies.
Patients requiring non-emergency care may be referred to
their family physician. Prescription renewals **will not**
be filled in the Emergency Department.

Please note that Residents requiring access to
Emergency for non-Acute Services after 8:00 p.m. are
reminded to attend Fort Saskatchewan Health Centre, St.
Joseph's General Hospital (Vegreville) or another

community hospital which offers 24-hour Out-Patient/Emergency Services.

2017 Community Newsletter – Summer Edition

Emergency Services – continued ..

An important message to all Residents of our community...

Please note that if you are experiencing chest pain or if you are in severe respiratory distress, please call an Ambulance immediately and get to the hospital for assessment and management.

Ambulance and other emergency vehicle traffic can access the Emergency Department on the West side of the Main Entrance via 52nd Avenue and North on 54th Street.

Accordingly, if you or an Ambulance should visit the Emergency Department after 8:00 p.m. for a life-threatening emergency, a Nurse will assess your condition and will provide advice about treatment options or request the presence of the Physician on-call for immediate treatment if required and deemed necessary.

Calling the hospital after 8:00 p.m. may not provide an answer to your problem/concern; you may be asked to visit the nearest Emergency Department or if you require advice call HEALTH Link Alberta '811'.

HEALTH Link Alberta Health advice 24 hours a day Call '811'

You never know when you'll need immediate health advice or information. That's why Health Link Alberta is available to you 24 hours-a-day, 7 days-a week. One call will connect you to a Registered Nurse who can answer your questions and give you sound advice whenever you need it because health needs don't keep office hours. Current reports indicate that the Health Link is serving a very useful purpose.

Visiting Specialists

* Obstetrician/Gynaecologist Dr. S. Azer

* Ophthalmology Dr. R. Harris, Dr. M. Kutzner & Dr. J. Heston

* Stress Testing Dr. A. Bharmal

* Orthopedic Surgeon Dr. A.R. Manolescu

* Appointments with Dr. Azer, Dr. Harris, Dr. Kutzner, Dr. Heston, Dr. Bharmal and Dr. Manolescu are made through their respective Offices.

Foot/Ankle Surgical Specialist Dr. Karim Ravji
Dr. Samir Lalani

Appointments with Dr. Ravji and Dr. Lalani are by Referral Only.

This Clinic offers a variety of Foot Care Services including Diabetic Foot Care, STEM Cell Injections, Orthotics, etc.

Visiting Specialists – continued ..

ENT Specialist Dr. V. Velmurugiah
Appointments by Referral Only Phone: 780-579-1717

Alberta Health Services – Home Care/Community Health, Rehab Services, Mental Health & Addiction Services

These Services are available from the **Lamont Health Unit** which is located in the **Archer Building** of the Lamont Health Care Centre. Residents requiring access to these Services may call **780-895-2211** and ask for Home Care, Community Rehab or Mental Health & Addiction Services.

Lamont Dental Clinic **Dr. Dorothee Saleski - Dentist**

Clinic Days: **Tuesday through Friday**

Clinic Hours: **9:00 a.m. – 5:00 p.m.**

Telephone: **780-895-2566**

Clinic is located on Main Street Lamont (next to Alberta Treasury Branch).

Parking

Community patrons are reminded to observe/obey the parking signs around Lamont Health Care Centre. Please do not block the Main Entrances, Fire Hydrant or any other marked areas. **Vehicles found in these locations will be towed away at owner’s expense.**

Patrons are also asked to turn off running engines since the engine exhaust is taken into the regular ventilation system. The exhaust can be very nauseating to Patients, Residents, Staff and Visitors.

Patrons who attend Lamont Medical Clinics are reminded that the West Parking Lot is designated for Staff Parking Only.

Visitors are asked to park along the public streets. This also includes visitors to Morley Young Manor.

Smoking

Lamont Health Care Centre is a designated smoke-free facility (Hospital & Grounds). **We ask those who need to smoke, to do so at least 5 metres away from all doorways and building entrances.** Please refrain from smoking in the Front Entrances.

Once again, we encourage all community patrons/patients and visitors to respect the ‘no smoking’ signs as posted.

The Town of Lamont has a new smoking bylaw; please note that smoking should always be at least 5 metres (approx. 16.5 feet) from entrances to public buildings. A fine will be enforced by the Town for non-compliance.

Volunteer Corner

Volunteers play an important role in our hospital, volunteering their talents to assist Residents and Patients with various activities. These include recreational support, bus outings, reading, directing patients to various services, walking Residents, etc.

Anyone who has an interest in serving at our Community Hospital is invited to contact Ms. Wendy Horricks at 780-895-2211; she will be pleased to offer a tour of the facility and also discuss areas of interest where you can play a significant role in the care and service offered to our Residents.

We know that Volunteers are the heart of our Community and they do not replace Professional Staff; however, the presence of Volunteers in our facility is a very valuable asset as they interact and build relationships with Patients/Residents. These relationships offer a unique experience in fostering Patient/Resident satisfaction and bringing smiles to the lonely and disenchanted.

You can make a difference; we invite you to take the first step and consider joining the team.

Please note that the Auxiliary of the Lamont Health Care Centre is recruiting new members and extends an invitation to the public to join the organization. The reward is the giving of one’s self in service to others. Men, women and youth are welcome to join. For further information please contact *Ms. Sheila Vilcsak* at **780-895-2971**.

Website

We invite you to visit the LHCC’s **Website** at **www.Lamonthhealthcarecentre.com**.

Please share your thoughts and provide your comments/feedback about the design/information and other features of this Website.

‘MEDICAL CORNER’

Recently, in the Lamont Health Care Centre we had a tragedy where someone came in with chest pain and because of the delay in presentation to the hospital had a very tragic outcome. I would like to take this opportunity to speak to you, the patient, with regards to the urgency of recognizing and managing chest pain appropriately. Chest pain obviously can occur for a variety of reasons. Sometimes chest pain is not cardiac related and sometimes it is.

Non-cardiac related chest pain should be evaluated in exactly the same way as cardiac-related chest pain because nobody can say at the outset what the cause is. For example; chest pain can be caused by chest

wall issues, stomach issues, abdominal issues and lung issues as well as referred pain from the back; however, only by coming to the hospital and getting investigated appropriately can a diagnosis of chest pain from cardiac causes be excluded.

2017 Community Newsletter – Summer Edition

'Medical Corner' – continued ..

The job of the doctor in the emergency department is to make sure that no emergency condition exists. The ER Department is not there to actually treat a patient for routine run-of-the-mill causes which can easily be handled in a physician's clinic; however, chest pain is an issue which requires a patient to come in to the ER in order to have a proper assessment. The outcome might be that the doctor says you are not having a heart attack and that you should follow up with your family doctor in order to evaluate the cause of your chest pain. That in itself is a very good use of the emergency system as well as it is a very responsible practice for the patient to come in for such a diagnosis.

When considering the cardiac cause of chest pain, please remember that this can be because of coronary artery disease or because of plaque rupture. Coronary artery disease could lead to a heart attack as could a plaque rupture.

Typical symptoms of a heart attack include chest pain or chest discomfort which could be pressure, tightness or squeezing on the chest. The pain spreads through the chest including into other areas of the body, namely the shoulders, arm, neck and lower jaw. The pain comes on gradually and lasts for more than a few seconds. Symptoms like this should be evaluated in an emergency department. Other symptoms that should potentially be evaluated in an Emergency Department, when they coincide with this or even if they occur separately but there is some concern that this might be a heart attack include: shortness of breath, nausea, vomiting, sweating, palpitations (i.e.: skipped heartbeats), lightheadedness, a tired feeling and fainting.

Please remember that given these symptoms they are in keeping with a concern for a heart attack when they are related to someone who has had a heart attack, had previous angina, had previous inflammation around their heart, if they have had a high cholesterol previously, they have been told that they have a skipped beat previously, they have had a murmur detected in the heart or if there is any concern that they may or may not have an aneurysm or be told that they had an aneurysm by their family doctor.

Chest pain that lasts for more than a few seconds should not be ignored and the appropriate response is to come to the Emergency Department immediately. It should not be ignored. It should not be delayed. If the pain goes away it does not mean that the

condition has been resolved; because, at that moment there is no diagnosis of whether this is a heart-related cause of chest pain or a non-heart related cause of chest pain.

Please remember, a non-heart related cause of chest pain is unlikely to be fatal whereas a heart-related chest pain can potentially be fatal. As I indicated in my introduction, so was the case in the previous patient.

The first thing that should happen when you come to the hospital is that we evaluate your chest pain by taking a history, you may get oxygen and you may be given Aspirin to chew. This is all appropriate even if it is not a heart attack. The first two tests that we do are an ECG and blood tests and this tells us what potentially could be the cause of the chest pain; whether it is heart-related or not. Sometimes the patient has to remain in hospital because their story is very typical for chest pain related to a heart cause but the tests have come back negative. This does not mean that the test is negative; it means that the first set of tests is negative but we have to repeat the tests and compare the two results.

Please remember that in the hospital we have medication that can be given immediately; that is within ten minutes to half an hour for a heart attack which will result in the resolution of the chest pain and it would, in fact, save a life. However, this does not mean that this is definitive treatment. Eventually you may be required to go to the city in order to get definitive treatment (a stent or even a bypass); however, the first step always starts with coming to the Emergency Department to get all causes of chest pain evaluated.

I hope that this has given you a better insight into the management of chest pain as it is my intention as well as the intention of my colleagues that the situation I mentioned in the introduction does not happen again.

Have a safe and enjoyable summer!

- Dr. Zainool Mohamed, Chief of Medical Staff-LHCC

Donations

We encourage community support of monetary gifts, memorial donations and/or bequests to Lamont Health Care Centre.

Donations are used to enhance the care and service provided and are directed toward the purchase of capital equipment, various Patient/Resident Comforts or other specified purposes.

The need for new and improved technology is ongoing; your support makes a difference in the lives of those entrusted in our care; every donation, no matter how small, makes a difference.

Your support has been and will always be invaluable as we strive to find ways to supplement the funding

provided to our facility in order to keep up with the purchase/addition of new technology at LHCC.

We acknowledge with sincere thanks and appreciation the following donations:
